

The Federal Communications Commission

Dear The Federal Communications Commission,

DO NOT TAX OR PLACE ANY FEES ON VOIP SERVICES, we have a great thing with VOIP. Phone companies can no longer monopolize and force us to pay high fees. Do not ruin this good thing we have with VOIP. We pay for internet, therefore we should be able to do what we want with it and should not be taxes and pay any fees if we decide to your a VOIP service.

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Stephen Sardina
